Competencies

Software Best Practices

Web development projects

Programming

I work as a programmer and web developer with a focus on creating games, apps, and websites. I've been studying WhiteHat Jr. for the past three years, during which time I've created a number of websites, games, and apps using HTML, CSS, JavaScript, and Python. I am conversant in Bootstrap.

Some of the games, apps, and websites I have developed are highlighted below:

Twitter:- A database app designed to communicate with different people around the country.

Portfolio Creator:- A program designed to improve a user's job portfolio and update their work profile

Endless Dice Game:- A dice game with two players in which the winner is determined by tallying the scores at the conclusion

Sales Application:- A program designed to produce the absolute greatest and minimum profit possible in a given period of time

Super Mario Next Gen:- The Mario game with a dash of space-age technology

Work History

Web Designer Intern

New , Thane

- Wrote custom HTML and JavaScript for existing websites.
- Prioritized and problem-solved several tasks concurrently with minimum supervision.
- Developed testing code for web-based applications.
- Attended development programs to gain competencies and boost skills set.
- Used content creation tools and digital media to design web sites.
